Windows 2003 Server partition resize tutorial

What would you do if the system C drive running out of space on your Server? If you want to resize server 2003 partition to maximize the performance of your computer, which software you will choose? This article will recommend you an award-wining Server partition software to resize partition in Windows Server 2000/2003/2008 - Partition Magic Server Edition, which can resize partitions & hard drive on your Windows Server 2003 without losing data, and the work to **resize 2003 Server partition** will be a piece of cake even for the ordinary users.

Why Resize 2003 Server partition?

When the boot partition C: drive running of space, the Server computer will be fighting for the precious space and will run slowly. To start over is a solution but no one would like to waste their happy weekend to do it. The most time-saving and easy way is to resize C: drive with reliable Server partition software. Except resizing Server 2003 partitions, Server partition software can also merge partition to solve low disk space problem, copy partition and resize partition to improve computer performance.

Choose proper 2003 Server partition resize software

Network administrators need to take good care of these Server computers. That's why the software installed on Server computers are strictly chosen by administrator, especially the computer utilities, which are able to maximize the performance of the Servers, like server partition management software.
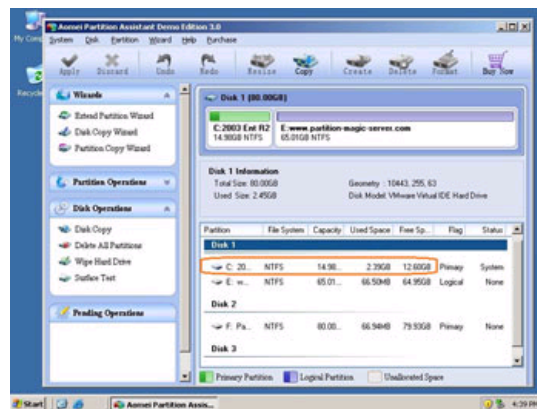

For a Windows Server 2003 user, to resize 2003 Server partition is not an easy task to do. Some unreliable software might destroy all your valued data during the process of resizing server partition under Windows Server 2003 Operating System. Now, there is a fantastic partition software to resize partition Server 2003) – Partition Magic Server Edition.

It did everything and performed all the advanced functions well just as it claimed, including resize Server partitions, create, delete partitions, format partitions, etc. It is compatible with Windows Server 2000/2003/2008 and Non-Server 2000/XP/Vista/Windows 7 (32 and 64 bit) systems.
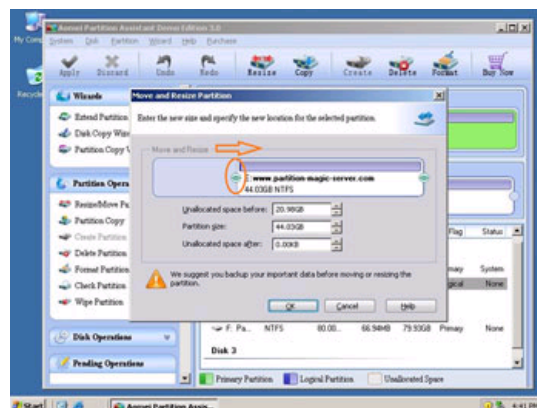

With the help of Partition Magic Server Edition, you will find the way to resize Server 2003 partitions is very simple. The enhanced data protection technology helps you resize partition Server 2003 without destroying data.

How to resize 2003 Server partition fast and easily?

Step 1, Launch Partition Assistant Server, you'll see all disks and partitions that connected to your Server and free space, used space and other properties of each partition.

Right-click the data partition and select "Resize", in the pop-up window, drag the left border rightwards to shrink it.
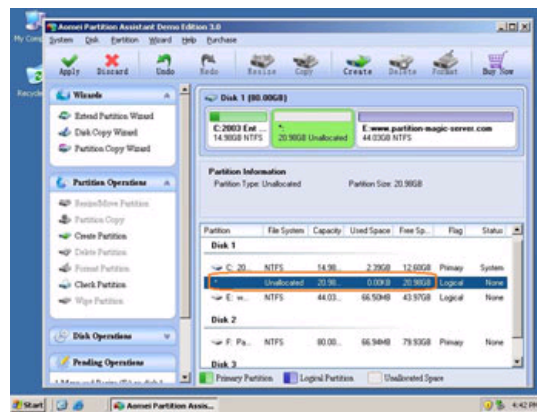

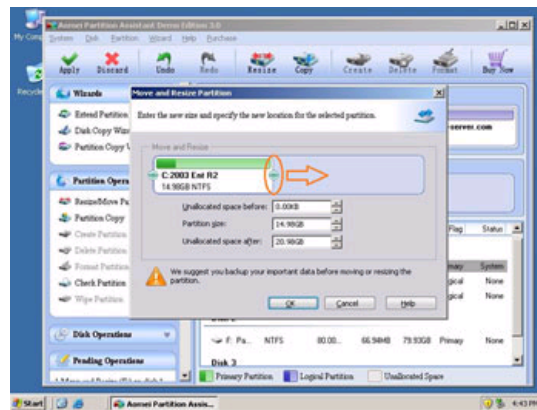

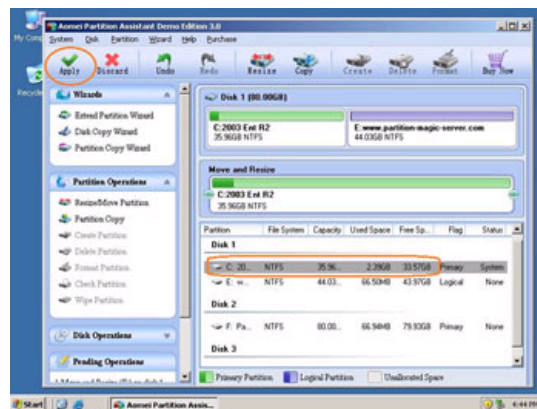

There will be some Unallocated space behind the system partition.

Step 2, Right-click the system partition and select "Resize", in the pop-up window, drag the right border rightwards to hold the Unallocated space.

Click "Apply" to proceed, done.

Now you have a "new" Server that can be used for a long time again.

How to allocate free space from any data partition and add to C drive without losing data?

For enterprise users, Unlimited Edition allows unlimited usage within your company to save time and money.
