## How to extend Server 2003 boot partition without data loss, fast and easily?

### Extend boot partition in Server 2003

Today's hard drives feature jaw-dropping amounts of space. But no matter how big your drive, you'll be amazed at how quickly application installs, browser caches, and temporary files can eat up your free space and clutter your system.

As computer technicians, we are always asked with the same question how to **extend server 2003 boot partition** without destroying data. To many Server administrators, it seems hard to do this, maybe hard to select a reliable [Server partition software](#).

Don't worry, in this article I'll introduce the awards-winning [Partition Magic Server](#) and how to extend Server 2003 boot partition without deleting or formatting partitions, fast and easily.

### Ensure data security when extending Server 2003 boot partition

The security and stability are undoubtedly the most significant aspects for Server computers since a Server computer usually stores the most important classified and daily-used files. However, even a slight error on server computer might directly leads to exposure of the whole network to the outside.

With **Enhanced Data Protection technology** built-in [Partition Assistant Server](#), you don't need to worry about the data security when repartitioning the Windows Server.

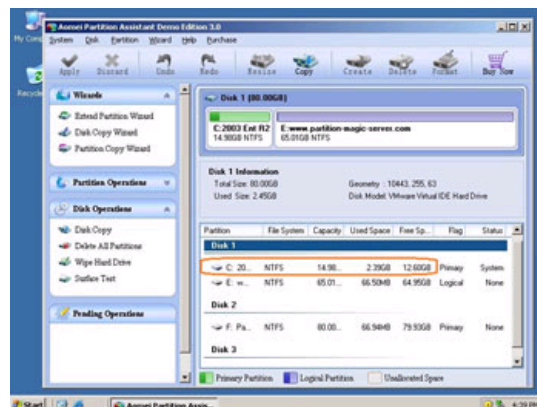

### How to extend Server 2003 boot partition?

By professional [Server partition software](#), you can easily resize, merge, extend partition on Windows Server, you just need to drag and move on its disk map to do, all operations can be previewed and cancelled.

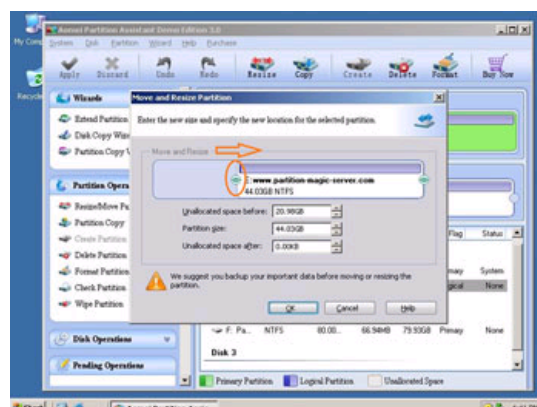

As the best [Partition Magic Server](#) alternative, [Partition Assistant Server](#) is an ALL-IN-ONE Windows partition solution and reliable disk management toolkit. Its unique Enhanced Data Protection technology helps you resize, merge, extend partition without data loss. Hot Resize feature helps you extend NTFS boot partition without rebooting Server.

### How to extend Server 2003 boot partition without deleting or formatting?

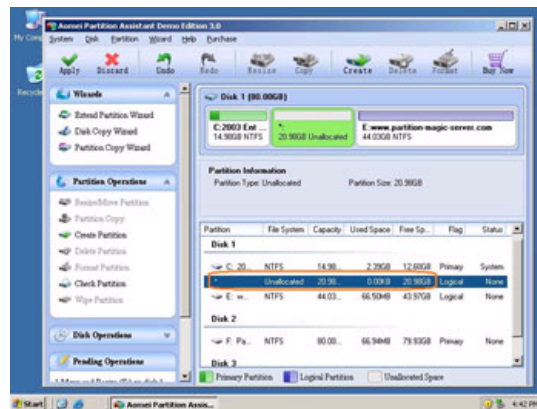

Step 1, Launch [Partition Magic Server](#), you'll see all disks and partitions that connected to your Server and free space, used space and other properties of each partition.

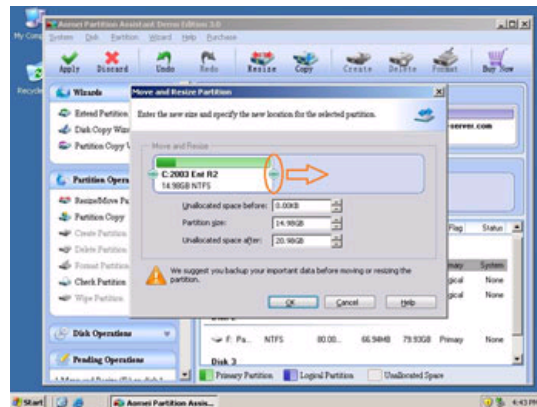

Right-click the data partition and select "Resize", in the pop-up window, drag the left border rightwards to shrink it.

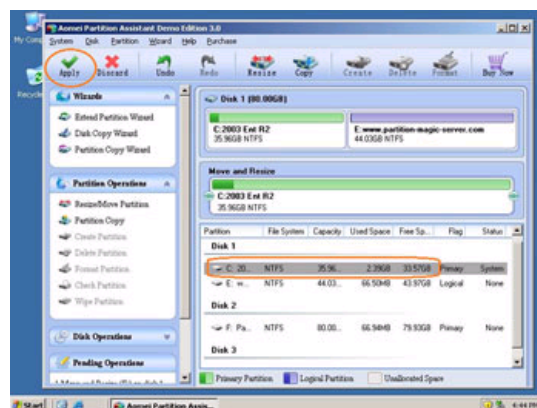

There will be some Unallocated space behind the system partition.

Step 2, Right-click the system partition and select "Resize", in the pop-up window, drag the right border rightwards to hold the Unallocated space.

Click "Apply" to proceed, done.

Now you have a "new" Server that can be used for a long time again.
