Partition Magic Windows 2003 Server 32 and 64 bit

Many Server administrators have encountered the problem that the system C: drive running out of space and "Low Disk Space" error constantly pop up. They are always amazed at how quickly Windows updates, application installations, browser caches, and temporary files eat up the free space and clutter the system.

If you are the administrator of the Server, what will you do? Seasoned administrator heard of [Partition Magic](#), which is able to resize, extend partition without deleting or reformatting, but for Windows 2003 Server, Partition Magic is useless, as since being acquired by Symantec, Partition Magic has not been upgraded and it is not able to extend, resize server partition under any advanced Operating System, such as Windows 2003, 2008, etc.

You need *Partition Magic Windows 2003 Server alternative*.

Partition Magic Windows 2003 Server Alternative

[Partition Assistant Server](#) is considered to be one of the best Partition Magic Windows 2003 Server alternatives, which is an ALL-IN-ONE Server disk management tool for Windows Server 2000, 2003, 2008, Small Business Server 2003, 2008, 2011 and Windows XP, Vista, 7 (32 and 64 bit).

It performs basic and advanced hard disk partition maintenance. This flawless hard disk management allows user to [Resize](#), [Merge](#), [Shrink](#), [Extend](#) system and data partition. [Create](#), [Delete](#), [Format](#), [Copy](#), [Hide](#), [Set Active](#), [Convert](#), [Wipe partition](#) and much more.

- ✓ Easily Drag and move partition on disk map to [repartition](#).
- ✓ Copy Partition/Disk to backup data or migrate entire disk without Windows reinstallation.
- ✓ [One click to Merge Partitions](#)/unallocated space into bigger one
- ✓ [One click to split Partition](#) into two or more small partitions
- ✓ [One click to allocate free space](#) from one partition to another

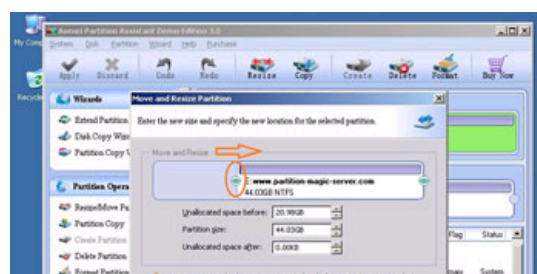

How to resize, extend partition with Partition Magic Windows 2003 Server?

With its user-friendly interface, the functions of this Partition Magic Windows 2003 Server are easy to get access to, no matter whether you have used partition toolkit or not. You just need to drag and move on the disk map to shrink a data partition and then extend the system C drive with the free unallocated space.

Step 1, Launch [Partition Magic Server](#), you'll see all disks and partitions that connected to your Server and free space, used space and other properties of each partition.

Right-click the data partition and select "Resize", in the pop-up window, drag the left border rightwards to shrink it.

Clients Worldwide

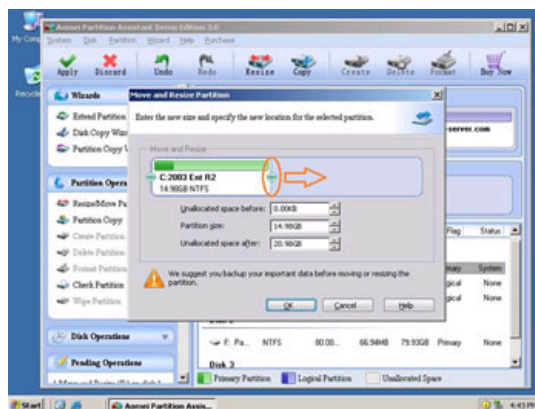

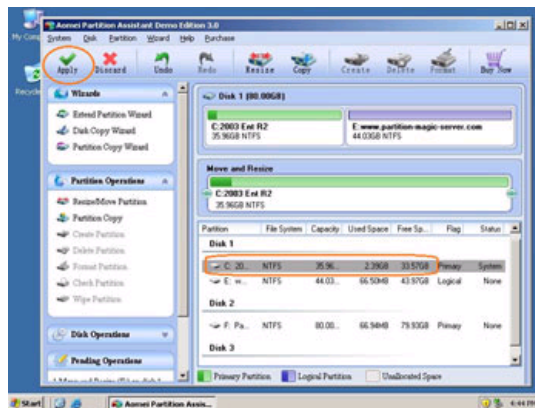

There will be some Unallocated space behind the system partition.

Step 2, Right-click the system partition and select "Resize", in the pop-up window, drag the right border rightwards to hold the Unallocated space.

Click "Apply" to proceed, done.

Now you have a "new" Server that can be used for a long time again.

Other ways to repartition Server 2003 drive without losing data

- ✔ [Extend Partition Wizard](#) - Shrink one or all data partitions and extend the system drive with step by step guide.
- ✔ [Allocate Free Space](#) - One step to shrink a specified data partition and extend the system drive.

For enterprise users, [Unlimited Edition](#) allows unlimited usage within your company to save time and money.

Download this Partition Magic Windows 2003 Server to check how easy it is to partition your Server drives.
