Partition Manager Server for Windows Server 2003/2008/2000 32 and 64 bit.

Looking for *Partition Manager Server* that works on Windows 2003 Server? In this article, I'll introduce the widely-used Server 2003 partition Manager.

What does Windows Server 2003 partition Manager do?

Generally speaking, you need Server 2003 partition Manager to optimize the usage of your Windows server hard disk space. A typical example is that the system C drive running out of space, so you need to merge, resize or extend your Server partitions without losing data to fix this problem.

With the advanced features of Windows Server 2003 partition Manager, you can maximize the Server's performance, for example, Create, Format, Delete, Copy, Wipe, Hide, set Active partition etc.

Partition Manager Server 2003

Partition Magic Server Edition is a magic ALL-IN-ONE server disk management toolkit for Windows Server 2000, 2003, 2008 both 32 and 64 bit. It performs basic and advanced hard disk partition maintenance, for example, resize, merge, shrink, extend system or data partition without losing data, etc. It also provides data protection and disaster recovery. The Server 2003 Partition Manager functions are brought together:Partition Manager, Disk & Partition Copy and Extend Partition Wizard.

The unique and most important features of this Server 2003 Partition Manager:

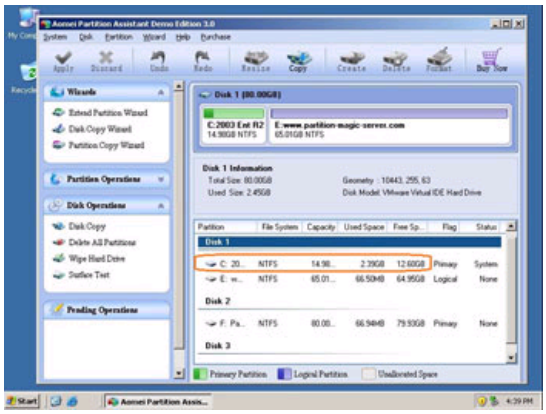
Enhanced Data Protection technology, with which you can merge, resize partition without data loss even when power off or hardware problem occurs.

With its **Hot Resize** feature, you can extend NTFS system partition without reboot to avoid Server downtime.

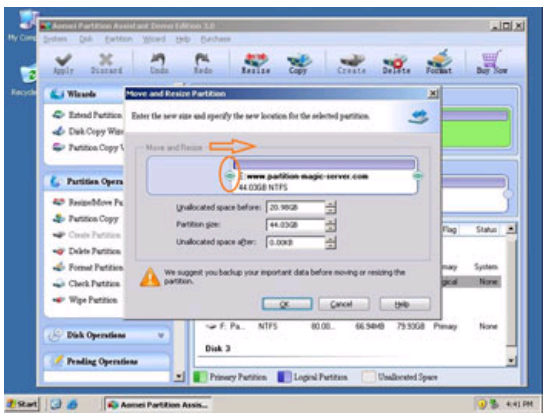
Due to its security, stability, easy to use, fully functional and cost-effective, Partition Magic Server is recommended as the Best Partition Manager for Windows 2003/2008 Server by many professionals and editors.

How to repartition 2003 Server with this partition manager

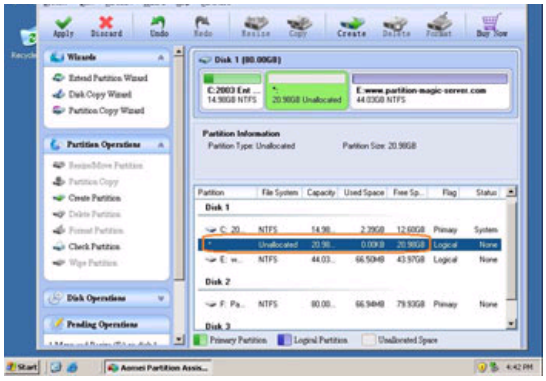
Step 1, Launch Partition Magic Server, you'll see all disks and partitions that connected to your Server and free space, used space and other properties of each partition.



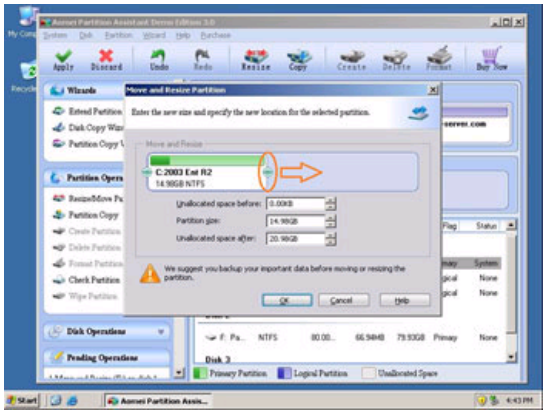
Right-click the data partition and select "Resize", in the pop-up window, drag the left border rightwards to shrink it.



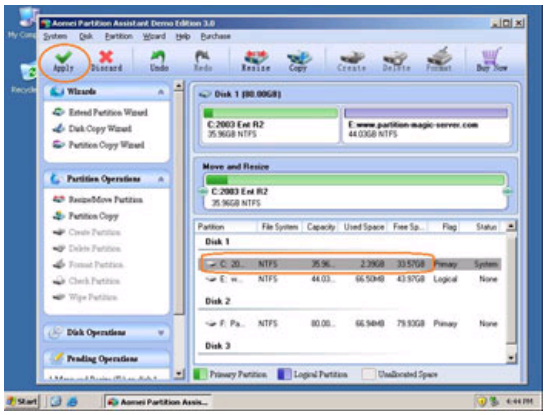
There will be some Unallocated space behind the system partition.



Step 2, Right-click the system partition and select "Resize", in the pop-up window, drag the right border rightwards to hold the Unallocated space.



Click "Apply" to proceed, done.



Now you have a "new" Server that can be used for a long time again.

How to allocate free space from any data partition and add to C drive?
