Full featured Windows Server 2003 partition tool

Why Windows Server 2003 partition tool

Generally speaking, you need Windows Server 2003 partition tool to optimize the usage of your Server computer disk space. A typical example is that the system C drive running out of space, so you need to merge or resize your Server partition to fix this problem.

Furthermore, increasing volumes of information requires companies to make better use of their hard drive space, so the need to reasonably resize, move, split, merge the partitions is more important than ever.

Which partition tool for Windows 2003 Server?

Partition Assistant Server Edition is an ALL-IN-ONE server disk management toolkit for Windows Server 2000, 2003, 2008 and Windows XP, Vista, 7 (32 and 64 bit).

It performs basic and advanced hard disk partition maintenance. This flawless hard disk management functions are brought together: **Partition Manager**, **Disk & Partition Copy** and **Extend Partition Wizard**. It allows user to Resize, Merge, Split, Extend system and data partition. Create, Delete, Format, Copy, Hide, Set Active partition, etc.

Unique features of this Windows Server 2003 partition tool

Enhanced Data Protection technology helps you can merge, resize partition without data loss even when power off or hardware problem occurs.

With its **Hot Resize** feature, you can extend NTFS system partition without rebooting.

User-friendly and easy to use. You just need to drag and move on the disk map to repartition hard drive.

How to partition Windows 2003 Server without data loss

Step 1, Launch **Partition Magic Server**, you'll see all disks and partitions that connected to your Server and free space, used space and other properties of each partition.

Right-click the data partition and select "Resize", in the pop-up window, drag the left border rightwards to shrink it.
