Partition Software for Windows Server 2008 32/64 bit.

Searching partition software for Windows Server 2008? There are many Windows Server partition software in the market, among these partition software, [Partition Assistant Server](#) is recommended as the best one.

What does Windows Server 2008 partition software do?

Generally speaking, you need Windows Server 2008 partition software to optimize the usage of your Windows server computer space. A typical example is that the [system C drive running out of space](#), so you need to merge or resize your Server partition to fix this problem.

With the advanced partition manager features of Windows Server 2008 partition software, it could maximize your Server's performance, such as Create, delete, format, wipe, hide/unhide, copy disk/partition.

Which partition software for Windows 2008 Server?

[Partition Magic Server Edition](#) is a magic ALL-IN-ONE server disk management for Windows Server 2000, 2003, 2008 and XP, Vista, Windows 7.

It performs basic and advanced hard disk partition maintenance, for example, [resize](#), [merge](#), shrink, extend system and data partition without losing data, etc. It also provides data protection and disaster recovery. The flawless hard disk management functions are brought together: [Partition Manager](#), [Disk & Partition Copy](#) and [Extend Partition Wizard](#).

The unique and most important features of this Windows Server 2008 partition software:

Enhanced Data Protection technology, with which you can merge, resize partition without data loss even when power off or hardware problem occurs.

With its **Hot Resize** feature, you can extend NTFS system partition without reboot to avoid Server downtime.

With [Partition Magic Server](#), you just need to drag and move on the disk map to shrink an existing data partition to get some Unallocated space, and then you can extend the system C drive. There is no need to delete or format partitions.

How to partitioning Windows 2008 Server without data loss

Step 1, Launch [Partition Magic Server](#), you'll see all disks and partitions that connected to your Server and free space, used space and other properties of each partition.

Right-click the data partition and select "Resize", in the pop-up window, drag the left border rightwards to shrink it.
