## Full featured Server partition resizer for Windows Server 2008/2003/2000

### Server partition resizer overview

The most common partition problem for computer users is that the Windows system partition runs out of space, the Windows system partition needs to be expanded. Furthermore, increasing volumes of information requires companies to make better use of their hard drive space, so the need to reasonably resize partitions is more important than ever. But for most users, changing partition structure requires Windows operating system reinstallation and format.

With our **Server partition resizer**, you can easily resize partitions on Windows Server 2008/2003/2000 without data loss, fast and easily. It is not only a Windows Server partition resizer, but also a disk management toolkit to better manage and maintain Servers.

### Ensure data security with this Server partition resizer

Any operations with hard drives are critical, and reliability of performance is one of the most important requirements when choosing **Server partition software**. Our **Server partition manager** is not only reliable itself with built-in Enhanced Data Protection but also integrated with the **Disk & Partition Copy Wizard** to ensure 100% data security. It is highly recommended by many professionals and editors, it is also the first choice of many Fortune 500, Universities and Governments.

### Key features of this Server partition resizer

This flawless hard disk management functions are brought together: **Partition Manager**, **Disk & Partition Copy** and **Extend Partition Wizard**. It allows user to Resize, Merge, Split, Extend system and data partition. Create, Delete, Format, Copy, Repair partition, etc.

With its **Hot Resize** feature, you can extend NTFS system partition without rebooting.

### How to resize partition with this Server partition resizer?

- It is extremely easy to resize Windows Server partitions. Just drag and move on the disk map to shrink an existing data partition to get some Unallocated space, and then you can easily extend the system partition, no need to delete or format.

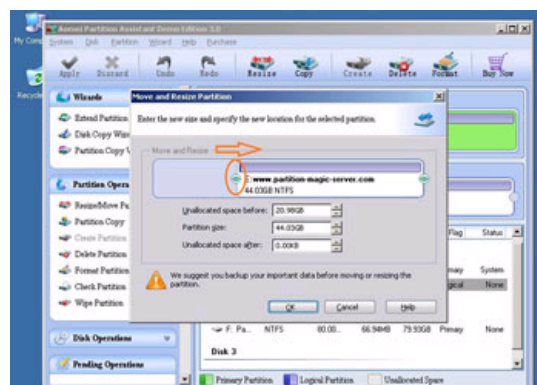

- Any operations you do on the Server will be listed in the "Operations Pending" column for you to preview.

- If the system partition is NTFS, you can extend it without rebooting.

Step 1, Launch **Partition Assistant Server**, you'll see all disks and partitions that connected to your Server and free space, used space and other properties of each partition.

Right-click the data partition and select "Resize", in the pop-up window, drag the left border rightwards to shrink it.

Clients Worldwide

There will be some Unallocated space behind the system partition.

Step 2, Right-click the system partition and select "Resize", in the pop-up window, drag the right border rightwards to hold the Unallocated space.

Click "Apply" to proceed, done.

Now you have a "new" Server that can be used for a long time again.
