Best Server partition software for Windows Server 2003/2008/2000

Are you still searching for **Server partition software** to resize, merge or extend partitions? Now you get the answer here. In this article I'll introduces several Server partitioning software, which are remanded as the best partition software for Windows Server.

Best Server partition software - Partition Assistant Server

Partition Magic Server Edition is a magic ALL-IN-ONE server partition software for Windows Server 2000, 2003, 2008 and XP, Vista, Windows 7. This Server partitioning software functions are brought together [Partition Manager](#), [Disk & Partition Copy](#) and [Extend Partition Wizard](#).

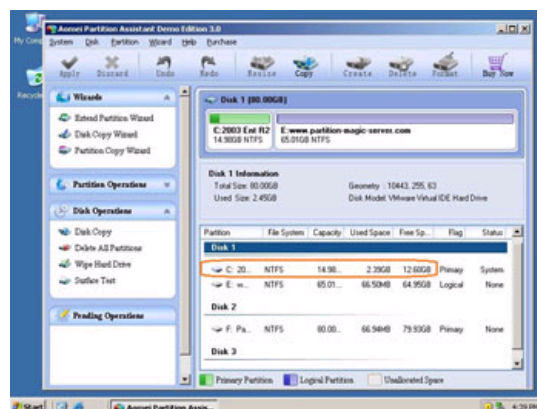

The most important: this Server partition software provides enhanced data protection technology, which helps you merge, resize partition without data loss even when power off or hardware problem occurs. With its Hot Resize feature, you can extend NTFS partition without reboot to avoid Server downtime.

With this Server partition software, you can [resize partition](#), [merge partitions](#), [extend system partition](#) without deleting or formatting. [Hide](#), [Create](#), [Format](#), [Convert](#), [Set Active](#), etc.

Clients Worldwide

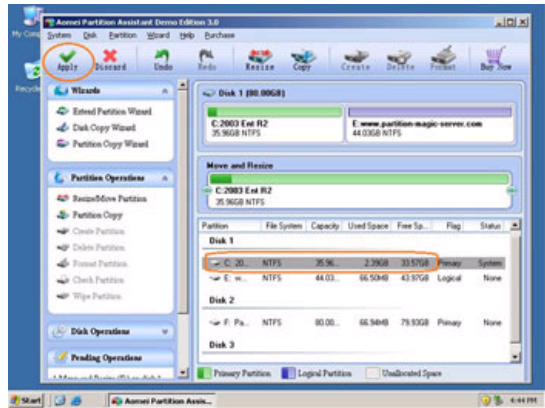

There will be some Unallocated space behind the system partition.

Step 2, Right-click the system partition and select "Resize", in the pop-up window, drag the right border rightwards to hold the Unallocated space.

Click "Apply" to proceed, done.

Now you have a "new" Server that can be used for a long time again.

How to allocate free space from any data partition and add to C drive?

For enterprise users, [Unlimited Edition](#) allows unlimited usage within your company to save time and money.

Download the [free trial version](#) of this **Server partition software** above for your Server and see how it works.
